About us:

We recently established a subsidiary of our Swiss company in Cambridge to expand our global service activities to the UK. With over 23 years of experience in the industry, we have a proven track record in IT consultancy and services, supported by numerous international customers. Our highly skilled staff is in Germany, Switzerland, Romania, and now the UK.

We will build up a competence centre in the UK for an existing project.

We seek a skilled Software Developer and Machine Learner to join our team and contribute to developing cutting-edge artificial intelligence (AI) solutions. As a Software Developer and Machine Learner, you will play a pivotal role in designing, developing, and implementing intelligent software programs that harness vast amounts of data to automate processes, optimize decision-making, and enhance user experience. Your expertise will span various programming languages, including Python, C++, Java, LISP, and Prolog, enabling you to tackle complex machine-learning tasks with finesse.

Responsibilities:

- Design, develop, and maintain machine learning models using Python and other relevant programming languages
- Implement and integrate AI tools and libraries into existing software systems
- Collaborate closely with data scientists and software engineers to gather requirements, analyse data, and optimise AI algorithms
- Conduct experiments and evaluate the performance of machine learning models to ensure optimal outcomes
- Write clear and concise technical documentation to facilitate team communication and knowledge sharing
- Stay abreast of the latest advancements in AI and machine learning to improve and expand expertise continuously
- Your profile:
- Strong proficiency in Python, C++, Lisp, and Prolog
- Experience in AI and machine learning, with a good understanding of algorithms, neural networks, and data structures.
- Familiarity with AI frameworks and libraries.
- Excellent problem-solving skills and the ability to think algorithmically.
- Strong communication and teamwork skills.

Benefits:

- Competitive salary and benefits package
- Opportunity to work on cutting-edge AI projects
- Collaborative and supportive work environment
- Professional development and training opportunities
